DETAILED ACTION

1. This office action is in response to applicant's Terminal disclaimer 5/07/2008 and amendment 7/02/2008.

Applicant's terminal disclaimer, amendment to specification and claim to correct the informality, is acknowledged and entered. The nonstatutory double patenting rejection and the objection(s) is/are thus hereby withdrawn.

Applicant's argument with respect to the art rejection has been considered and found persuasive. The rejection is hereby withdrawn.

Allowable Subject Matter

2. Claims 12-22 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of Schnabl et al. discloses an eddy current testing and further discloses the probe adapts itself with respect to the diameter (Col. 1 lines 36-40). However, the prior art of record does not teach or fairly suggest an eddy current probe for electrical measurement having a substrate with a resting surface and the resting surface comes to lie on a test piece; two electrical components mounted on the substrate such that the probe with the substrate is flexible and the probe with the substrate adapts itself to a different radii of curvature of the test piece; wherein the exciter coil encloses a coil section of the signal coil and the signal coil and the exciter winding lie in one plane or on a surface of the substrate, as recited in the independent claim 1 and in combination of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
